CASE STUDY # 3

1. Has a shooting or other violent episode ever occurred at your school? If so, how did students react? Do you feel safer at school than at home, as experts say you are?

Yes, there was a lot **violent episode** even **incident** in which many people face injury and even someone have **fracture** in those **incident**. One most danger was held when I was in 6th class and my age was around 14 year old. The day was going as common as suddenly a fight between an Urdu speak and Khan Start both were at 10th Class. The school management do some action and both parents were call but within some time both call their friend at the school and school look like battle field 30 30 person from Both side. After all things cooled down **school management** start there action they give TC to all Student who were involve in the entity case. I was fell like that School days were safer and even because of school management

2. What steps have administrators at your school taken to prevent violence? Have they been effective, or should other steps be taken?

After all things cooled down **school management** start there action they give TC to all Student who were involve in the entity case and make some categories of student who were involve in those fight first one was directly terminated from school and second ones who were in fight but does don't catch by the teacher so they were just give TC for 7 days and last ones were only watch those have just close of break and even no free periods and etc. So I was thinking steps were **effective** and make **violence stopper**
